Attempt all the questions on the answer sheets.

Scenario: You are a student in your third year of the Computer Science program at FAST-NUCES. The university's CS Department is looking for Teacher Assistants to work alongside faculty members in various courses. As a Teacher Assistant, your responsibilities would include assisting in marking students' assignments, and offering support during classroom activities and discussions. The university is looking for candidates who are dependable, collaborative, and passionate about contributing to a positive learning environment.

Q1: Write an application to the Manager Academics Sir Saifullah describing why you are interested in the Teacher Assistant role and how your skills and experiences align with the responsibilities outlined above. (15)

Q2: Paraphrase the given paragraph and do the in-text citation according to APA 7th Edition. (15)

Traffic rules violations in Lahore are a prevalent issue that contribute to road congestion, accidents, and overall safety concerns. From reckless driving and speeding to disregarding traffic signals and improper lane usage, these violations pose significant risks to motorists, pedestrians, and cyclists alike. The lack of enforcement and accountability compounds the problem, leading to a culture of impunity on the roads. Addressing this issue requires a multifaceted approach, including stricter enforcement by traffic authorities, public awareness campaigns on road safety, and educational initiatives to instill a sense of responsibility among drivers. By promoting adherence to traffic rules and fostering a culture of compliance, Lahore can mitigate road hazards and enhance overall traffic management. | 5-

Navigating Traffic: Challenges and Solutions in Lahore

(Khan, 2022)

Q3: Write a 5 paragraph Descriptive Essay describing the vibrant Sunday market. Use sensory details and figurative language to describe the atmosphere, products and the crowd. /25

Q4: Read the paragraph given below and write your opinion on the impact of artificial intelligence in revolutionizing student learning? Support your opinion with logical reasons and evidence from the text.

Arg/Response.

Note: Write a paragraph of 80-100 words.

(10)

Artificial Intelligence (AI) offers both advantages and disadvantages for student learning. On the positive side, AI technologies can personalize education, adapting to individual student needs and learning styles. This can enhance engagement and comprehension, leading to more effective learning outcomes. Additionally, AI can provide immediate feedback and support, allowing students to receive assistance outside of traditional classroom hours. However, AI in education also raises concerns. It may lead to over-reliance on technology, reducing human interaction and personalized teaching. Privacy and ethical issues related to data collection and algorithm biases are also important considerations. Overall, while AI has the potential to revolutionize education, careful implementation and oversight are essential to maximize benefits while mitigating risks.
