Quiz 2

Computer Programming (CL103)

Course Instructor	Mr. Bismillah Jan
Lab Instructor(s)	Yahya Ali Zainab Amir
Section	B
Semester	Fall 2018

Department of Computer Science
FAST-NU, Lahore, Pakistan

Total Marks: 15

Time 30 mins

Question: Implement Clock class and run main.

- It is very important that you read the main to understand the functionality of the member functions.
- Do not change the helper code. You don't need any extra function. Only use the given member functions and variables.
- Handle edge cases related to hours, minutes and seconds
- Write a separate .cpp file for the implementation and only submit that file.

Best of luck
