

Fundamentals of Computer Vision
Fall – 2016
Assignment # 4

Submission date: **30th November**

Problem # 1:

Implement Region Growing technique. Take seed points from the user (there can be multiple seed points).

You can access stack by the following commands

```
stack=java.util.Stack()  
stack.push(i)  
stack.pop()
```

Apply segmentation process on the attached image.

Good Luck
