

Write the output of code segments given below and if there is any error, mention clearly.

```
class Number{
public:
    int* value;
    Number(int v) {
        value = new int(v);
        cout << "Value: " << *value << endl;
    }
    ~Number() {
        cout << "Killed: " << *value <<
endl;
        delete value;
    }
};

void Difficult(Question why){
    Question Quest = why;
}
```

```
class Question{
public:
    Number marks;
    Question(int A) : marks(A) {
        cout << "New Object \n";
    }
    Question(const Question &X) :
marks(*X.marks.value + 10){
        cout << "ItsEasy" << endl;
    }
};

void main(){
    Question Answer(1);
    Difficult(Answer);
}
```

Output/Error:

```
Value: 1
New Object
Value: 11
ItsEasy
Value: 21
ItsEasy
Killed: 21
Killed: 11
Press any key to continue . . .
```
