

Department of Computer Science

CS411 - Network Security
April 27th 2020
Assignment 3 - Weight 4 %
Group assignment

- 1. Make groups of 2 (from the same section).**
- 2. Read the instructions provided in “Attacks on the TCP Protocol” (Chapter 13 (or 16 in the newer version) of A Hands-on Approach by Wenliang Du). Pdf of Chapter 16 from the newer version is available on SLATE.**
- 3. Launch the SYN Flooding attack using the VM from SEED LABS.**
- 4. Prepare a word document reporting all the steps carried out. Use screen shots to show your actions and their results.**

Notes

- 1. Names of both group members should be visible on every screen shot.**
- 2. Title page of the assignment should clearly mention the names and IDs of both groups members**
- 3. You are also allowed to collaborate with you friends as much as you like. However, copying their screen shots is STRICTLY PROHIBITED.**

Deadline to submit: Sunday May 10th, 11:55 PM via SLATE.
