

## National University of Computer and Emerging Sciences, Lahore Campus

	Course Name:	Enterprise Information System	Course Code:	CS 422
	Program:	CS	Semester:	Spring 2020
	Duration:	12 Hours	Total Marks:	16
	Paper Date:	18 June 2020	Weight	5
	Section:	ALL	Page(s):	1
	Exam Type:	Take Home Quiz		

**Student : Name:** \_\_\_\_\_ **Roll No.** \_\_\_\_\_  
**Section:** \_\_\_\_\_

Note: Please submit the word document typed answers.

This question tests your understanding of the information needed to trace a sale through a multistep ERP sales cycle: sales order, inventory sourcing, delivery, billing, and payment. Assume that an order has been placed with your company and entered into your ERP system. The following events then take place: (2 x 8)

Question	Answer
The system automatically checks the customer's credit and finds it to be acceptable. The order is recorded for the delivery date requested.	
The system schedules the production of the goods. (There is not enough inventories to ship from stock.)	
The system schedules raw material orders from the vendors to produce the goods ordered.	
The raw materials are received and stored.	
The goods are produced and reserved for shipment to the customer.	
The system schedules the delivery, and an invoice is printed and included with the shipment. The goods are then put on the delivery truck	
Shipping notifies Accounting of the shipment's details.	
A month later, the customer sends in payment, which is recorded in accounting.	

For each of these events, list the information that must be recorded in the common database. You do not need to know how to use a database to do this, nor do you need to understand bookkeeping. For example, for the credit-check step, think about what information is needed to perform a credit check on a given customer.

At each step, did the wealth of the company increase or decrease? At each step, how did the

company's obligations to outside entities change? At each step, how did the obligations of outside entities to the company change? Justify each of your answer in one line or maximum two.

**Solution**

<p>a. Customer data, sales data</p> <p>No change in wealth</p> <p>Obligation increased by company to customer</p> <p>Obligation increased for customer to pay against order</p>
<p>b. Sales order data and raw material/inventory data</p> <p>No change in wealth</p> <p>No change</p> <p>No change</p>
<p>c. Supplier/vendor data, sales order data, raw material data</p> <p>No change in wealth</p> <p>Obligation increased for company to supplier</p> <p>Obligation increased for supplier to company</p>
<p>d. raw material data</p> <p>Wealth increased</p> <p>Obligation to vendor/supplier of raw material increased</p> <p>No change</p>
<p>e. Customer data, warehouse data, inventory data</p> <p>No change in wealth</p> <p>No change</p> <p>No change</p>
<p>f. Customer data, warehouse data, Sales data</p> <p>Wealth decreases</p> <p>Obligation for company to customer decreases</p> <p><b>No change</b></p>
<p>g. Sales data / <b>Shipment</b></p> <p><b>No change</b></p> <p>Obligation for company to shipment company increase</p> <p>Obligation for shipment company to company increases</p>

h. Customer data, sales data

Wealth increases

No change

Obligation for customer to company decreases
