CS303: Software Engineering

Project Deliverable 5: Prototype 1

Due Date: 1830Hrs, December 21, 2020   **Group Name:** _____

Group Members: _____, _____, _____,

_____, _____

Develop first prototype of your application. Keep the component-component interface in mind while developing. It is better to keep the components integrated. Complete navigation is expected in this prototype.

Zipped code will be submitted through slate before the deadline. There will be a demo in regular class time using the regular class Google Meet link.

Notes:

File name should follow the naming convention
Submitted file should contain roll numbers of all group members and the group name.
