	Course:	Object Oriented Programming	Course Code:	
	Program:	BS(Computer Science)	Semester:	Fall 2019
	Topic:	Operator Overloading	Total Marks:	10
	Due Date:	3rd October,2019	Weight	%
	Section:	A	Page(s):	1
	Exam:	Quiz 2	Reg. No	

Suppose you have the following class fraction
class fraction{

   int   *numerator;*

   int   denominator;

};

Assume you have all the required constructors and getter/setters.

Overload the + operator (as a member function) to do the following tasks.

For example 2/3 + 5/2 = 19/6
